| Beds of EWM and CLP present but they are small and sparse. I do not recommend treating at this time. | 2 | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | M | | | | | |

| Notes | 10 | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| Dominant plants are Large leaf, American, and Illinois Pondweeds which are beneficial natives. I do not recommend treating these plants. Invasive plants that are present do not pose a threat to overall abundance or quality of native species. | 11 | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
